SUMMARY

Experienced **Ph.D. Physicist** specializing in **semiconductor physics**, expert in **Machine Learning** and **Data Analysis**, seeking a role to drive impactful solutions.

SKILLS

Languages: Python, Julia, R, C/C++, C#, SQL, Bash

Tools: Machine Learning, Data Analysis, Visualization

Platforms: Linux, Git, HPC

EDUCATION

08/2019 - present

Ph.D: Physics/Material Science
GPA: 4.0/4.0

University of Central Florida

10/2017 - 07/2019

M.S.: Physics
GPA: 9.2/10, Valedictorian

National and Kapodistrian University of Athens

10/2011 - 07/2017

B.S. Physics

National and Kapodistrian University of Athens

INDUSTRY EXPERIENCE

5/2024 - 8/2024

Modeling Product Engineer Intern

ASML, Silicon Valley, CA

- Optimized **electromagnetic** simulations for geometrical corner rounding, reducing runtime by **5%**, memory usage by **10%**, and rounding time by **70%**. These improvements were integrated into **ASML's** latest software release and adopted by customers.
- Led **electromagnetic simulations** to optimize the Transition Cross Coefficient (TCC), reducing runtime by **9%** and memory usage by **34%**. Integrated into **ASML's** latest software release for a major customer.
- Engineered** a custom **Python library** to analyze large simulation datasets and automate pattern recognition across various system configurations.
- Collaborated with **cross-functional teams** to enhance the efficiency of computational lithography models.

Python / C/C++ / Bash

EXPERIENCE

8/2019 - present

DOE -NSF Funded

Research Assistant

University of Central Florida

- Modeled the **epitaxial growth of metals on semiconductors** to minimize defects and enhance charge transport properties for **junction development**, improving simulation accuracy and material design.
- Designed and implemented a **Deep Learning Neural Network** surpassing Density Functional Theory (DFT) in speed, optimizing semiconductor fabrication simulations and accelerating material discovery workflows.
- Developed and trained a **Convolutional Neural Network (CNN)** to predict metal-semiconductor deposition morphology images with simulation-level accuracy, using voxelized atomic properties for large-scale applications.
- Engineered a **Graph Convolutional Neural Network (GCNN)** for data retrieval, integrating it into a simulation tool to enhance the speed and accuracy of fabrication process simulations.
- Developed three custom Python libraries:** one for modeling complex systems in fabrication processes, one for electrochemistry, and one for rendering and visualizing 3D simulation data as 2D images.
- Developed an algorithm** for voltage control in electrochemical systems, enhancing simulation tools for cathodic reaction studies and validating the superior effectiveness of non-metallic cations in CO₂ reduction.
- Developed and implemented a **Deep Learning** model to predict CO₂ reduction into formate and carbon monoxide in large-scale systems, achieving real-world applicability for predictive modeling.
- Developed **Numerical Methods** and **Algorithms** for CO₂ adsorption energy calculations, achieving precision in cation effect modeling.
- Created a centralized **SQL** database by organizing existing group member data, enhancing accessibility and facilitating result validation.

Python / Julia / C/C++ / Bash

GitHub

10/2017 - 7/2019

NKUA Funded

Research Assistant

National and Kapodistrian University of Athens

- Designed simulations and developed a **Machine Learning** approach for identifying dark matter particles.
- Taught **modeling** and applications of **Machine Learning**, with a focus on **feature engineering techniques**.

Python / C/C++ / Bash

GitHub

TECHNICAL SKILLS

- Strong knowledge of **data structures**, designing and implementing efficient solutions for complex data challenges.
- Proficient in **data integration techniques** with **SQL**, extracting, loading, and transforming data for efficient processes.
- Expertise in **algorithm design** and linear programming
- Proficient in High-Performance Computing (HPC), specializing in Slurm for job scheduling, resource allocation, and optimization.
- Experienced in **parallel programming** and **GPU acceleration**,
- Proficient in **Git**, maintaining organized code repositories for collaborative data-driven projects.

MANAGEMENT SKILLS

- **Supervising and independently completing projects**, consistently meeting budget and deadline goals with high-quality execution.
- Proficient in **conceptualizing, planning, and executing** end-to-end data science initiatives to solve critical business challenges.
- Thriving in **diverse teams, fostering collaboration** and energizing **collective success**.
- Exceptional **communication and presentation skills**, bridging knowledge gaps and **ensuring clarity**.
- Excelled in **problem solving** and **analytical thinking** in dynamic evolving environments.
- **Excels in both written and verbal communication**, proficiently acquires knowledge and imparts insights with clarity.

SELECTED - PUBLICATIONS

Electronic structure of cobalt valence tautomeric molecules in different environments
