SUMMARY

Experienced **Ph.D.** in **Computational Physics**, adept in **mathematical modeling** and applying **AI/ML for quantitative research**, seeking a quantitative Scientist role to tackle complex challenges and drive impactful solutions.

EDUCATION

- 08/2019 - present **Ph.D Artificial Intelligence applications in Computational Physics** **University of Central Florida**
GPA: 4/4
- 10/2017 - 07/2019 **M.S. Computational Nuclear Physics** **National and Kapodistrian University of Athens**
Grade: 9.2/10, Valedictorian
- 10/2011 - 07/2017 **B.S. Physics** **National and Kapodistrian University of Athens**
Highly focused in Computational Physics

INTERNSHIPS

- 5/2024 - 8/2024 **Modeling Product Engineer Intern** **ASML, San Jose, CA**
- **Engineered** a custom **Machine Learning library** specifically designed for efficient analysis of rigorously simulated Finite-Difference Time-Domain (FDTD) images, enabling faster and more accurate results.
 - Led the improvement of the data automation tool, resulting in increased data processing efficiency for data science workflows.
 - Employed ASML's **automation tool** and conducted thorough **Data Analysis**, resulting in the extraction of actionable insights from the results.
 - Participated and contributed significantly in discussions, offering critical suggestions to improve the **Tachyon product**, increasing the efficiency of **computational lithography models** for **mask** optimization.

EXPERIENCE

- 7/2023 - 5/2024 **Machine Learning for Computational Chemistry** **University of Central Florida**
DOE Funded
- Conducted **mathematical modeling** and executed simulations, performed **data cleaning**, and undertook in-depth **data analysis** to investigate the impact of ammonium cations on the Bi-catalyzed CO₂ reduction reaction. Additionally, published a peer-reviewed paper exploring CO₂ reduction in small-scale systems.
 - Devised a novel **Machine Learning** approach to predict CO₂ reduction to formate and CO by manipulating large artificially generated datasets, successfully extrapolating these findings to electrochemical systems. **This work directly contributed to securing DOE funding.**
 - **Developed** novel **numerical methods and designed algorithms** to compute CO₂ adsorption energy, resulting in data segmentation into two distinct regions. These findings facilitated the calculation of electric forces and charges, revealing the impact of cations on CO₂ adsorption.
- Python / C++ / SQL / Bash GitHub
- 10/2022 - 7/2023 **Graph Neural Networks and Databases** **University of Central Florida**
scholarship holder
- **Mathematically modeled** and investigated how **Graph Convolutional Neural Networks** can improve the accuracy of retrieving deleted data. This facilitated collaboration between the Department of Statistics and Physics.
 - Created a centralized **SQL database** by collating and organizing existing group member data from the server. Enhanced accessibility and facilitated result validation among team members, promoting seamless collaboration and data-driven decision-making.
 - **Developed two custom Python libraries** enhancing the ability to create models that accurately represent complex systems in material design and electrochemistry. Utilized them for predictive machine learning and **optimized research group's data science library**, enhancing it's speed and performance.
- Julia / SQL / Bash GitHub
- 8/2019 - 10/2022 **Machine Learning for Computational Physics & Algorithm Design** **University of Central Florida**
NSF Funded
- Implemented **ML** and introduced a second-generation **neural network** potential to understand the behavior of metals on semiconductors, outpacing Density Functional Theory (DFT) in terms of speed and accuracy. This accomplishment played a pivotal role in securing **NSF funding**.
 - Created a fourth-generation **Neural Network** potential to overcome constraints in existing machine learning models, for predicting the behavior of **metals on semiconductors**, focusing on long-range charge transfer. This potential was adopted by our **data science** group, accelerating computational calculations.
 - Engineered state-of-the-art **numerical methods** and **designed cutting-edge algorithms** for chemical potential calculations of **metal on semiconductor junctions**, leading to a collaboration with UC Davis.

- Taught physics labs with a focus on analyzing and **applying** simple **machine learning models** to artificial data generated from simulations, as well as real data collected from our laboratory. Implemented **feature engineering** techniques, including data cleaning and transformation, to enhance the quality and relevance of the datasets.

Python / C++ / SQL / Bash

GitHub

10/2017 – 7/2019
NKUA Funded

Machine Learning for Detection of Dark Mater

National and Kapodistrian University of Athens

- Applied simulation techniques and engaged in the development of a sophisticated **Machine Learning Approach** for Dark-Matter Particle Identification, navigating the challenges presented by extremely low temperatures with **precision and ingenuity**.
- Conducted Physics labs for undergraduates, immersing students in the intricacies of **statistical data analysis** and the art of data preparation for the application of **machine learning algorithms**.

Python / SQL / Bash

GitHub

TECHNICAL SKILLS

- Exemplary knowledge of **data structures**, consistently designing and implementing efficient and optimized solutions for complex data-related challenges.
- Master (data integration) techniques with SQL, loading, extracting, and transforming data to ensure seamless and efficient processes.
- Expertise in **algorithm design** and **data science software architecture** for streamlined data workflows.
- Proficient in **high-performance computing cluster management**, specializing in **Slurm** for job scheduling, resource allocation, and **performance optimization**.
- Demonstrated **Git** expertise, maintaining organized code repositories for collaborative, data-driven projects.
- Proficiently creates compelling data visualizations with **Tableau**, **Matplotlib**, and **gnuplot** for clear communication of complex insights.

MANAGEMENT SKILLS

- **Supervising and independently completing projects**, consistently meeting budget and deadline goals with top-tier execution.
- Proficient in **conceptualizing, planning, and executing** end-to-end data science initiative aimed at solving critical business challenges.
- Successful in leading **diverse teams**, fostering **collaboration** and energizing **collective success**.
- Exceptional **communication and presentation skills**, bridging knowledge gaps and **ensuring clarity**.
- Excelled in **problem solving** and **analytical thinking** in dynamic evolving environments.
- **Excels in both written and verbal communication**, proficiently acquires knowledge and imparts insights with clarity.

SPOKEN LANGUAGES

- English (Proficient)
- Greek (Native)
- German (Intermediate)

AWARDS-FELLOWSHIPS

- Peer Tutoring Award UCF
- Research & Teaching Assistant Fellowship UCF Physics Dept

CONFERENCES

- American Physical Society, IL.
- American Physical Society, NV.
- STEM conference, FL.
