SUMMARY

Experienced **Ph.D. Physicist** specializing in **semiconductor physics**, expert in **Machine Learning** and **Data Analysis**, seeking a role to drive impactful solutions.

SKILLS

Languages:	Python, Julia, R, C/C++, SQL, Bash, HTML
Tools:	Machine Learning, Data Analysis, Visualization
Platfroms:	Linux, Git, HPC

EDUCATION

08/2019 - present	**Ph.D: Physics/Material Science** **GPA: 4.0/4.0**	**University of Central Florida**
10/2017 - 07/2019	**M.S.: Physics** **GPA: 9.2/10**, **Valedictorian**	**National and Kapodistrian University of Athens**
10/2011 - 07/2017	**B.S. Physics**	**National and Kapodistrian University of Athens**

INDUSTRY EXPERIENCE

5/2024 – 8/2024	**Modeling Product Engineer Intern**	**ASML, Silicon Valley, CA**

- Optimized **electromagnetic** simulations for geometrical corner rounding, reducing runtime by **5%**, memory usage by **10%**, and rounding time by **70%**. These improvements were integrated into **ASML's** latest software release and adopted by customers.
- Led **electromagnetic simulations** to optimize the Transition Cross Coefficient (TCC), reducing runtime by **9%** and memory usage by **34%**. Integrated into **ASML's** latest software release for a major customer.
- **Engineered** a custom **Python library** to analyze large simulation datasets and automate pattern recognition across various system configurations.
- Collaborated with the optics team to improve the efficiency of computational lithography models.

```
Python  /  C/C++  /  Bash
```

EXPERIENCE

8/2019 – present **DOE -NSF Funded**	**Research Assistant**	**University of Central Florida**

- Modeled the **epitaxial growth of metals on semiconductors** to minimize defects and enhance charge transport properties for **junction development**, improving simulation accuracy and material design.
- Designed and implemented a **Deep Learning Neural Network** surpassing Density Functional Theory (DFT) in speed, optimizing semiconductor fabrication simulations and accelerating material discovery workflows.
- Developed and trained a **Convolutional Neural Network (CNN)** to predict metal growth on semiconductors using voxelized atomic properties, achieving simulation-level accuracy and scalability for large-scale systems.
- Engineered a **Graph Convolutional Neural Network (GCNN)** for data retrieval, integrating it into a simulation tool to enhance the speed and accuracy of fabrication process simulations.
- **Developed three custom Python libraries:** one for modeling complex systems in fabrication processes, one for electrochemistry, and one for rendering and visualizing 3D simulation data as 2D images.
- Designed **algorithms** to maintain constant voltage in electrochemical simulations and **integrated** them into the **simulation** tool, demonstrating the superior effectiveness of non-metallic cations over metallic counterparts in the CO_2 reduction reaction.
- Engineered **Machine learning** models to predict CO_2 reduction into formate and carbon monoxide in large-scale systems, directly applicable to real-world problems for predictive modeling.
- Developed **numerical methods** and **algorithms** for CO_2 adsorption energy calculations, achieving high precision in modeling cation effects in the CO_2 reduction reaction.
- Created a centralized SQL database by organizing existing group member data, enhancing accessibility and facilitating result validation.

```
Python  /  Julia  /  C/C++  /  Bash                                    GitHub
```

10/2017 – 7/2019 **NKUA Funded**	**Research Assistant**	**National and Kapodistrian University of Athens**

- Designed simulations and developed a **Machine Learning** aproach for identifying dark matter particles.
- Taught **modeling** and applications of **Machine Learning**, with a focus on **feature engineering techniques**.

```
Python  /  C/C++  /  Bash                                              GitHub
```

TECHNICAL SKILLS

- Strong knowledge of **data structures**, designing and implementing efficient solutions for complex data challenges.

- Proficient in **data integration** techniques with SQL, extracting, loading, and transforming data for efficient processes.

- Expertise in **algorithm design** and **data science software architecture** for optimized data workflows.

- Proficient in **High-Performance Computing** (HPC), specializing in **Slurm** for job scheduling, resource allocation, and **optimization**.

- Proficient in **Git**, maintaining organized code repositories for collaborative data-driven projects.

- Proficient in creating compelling data visualizations with **Tableau, Matplotlib, and Gnuplot** to clearly communicate complex insights.

MANAGEMENT SKILLS

- **Supervising and independently completing projects**, consistently meeting budget and deadline goals with high-quality execution.

- Proficient in **conceptualizing, planning, and executing** end-to-end data science initiatives to solve critical business challenges.

- Thriving in **diverse teams**, **fostering collaboration** and energizing **collective success**.

- Exceptional **communication and presentation skills**, bridging knowledge gaps and **ensuring clarity**.

- Excelled in **problem solving** and **analytical thinking** in dynamic evolving environments.

- **Excels in both written and verbal communication**, proficiently acquires knowledge and imparts insights with clarity.
